

SUNDAY
ULTRA-DWARF BERMUDAGRASS™

Sunday™ Ultra-Dwarf Bermudagrass

Sunday™ Ultra-Dwarf Bermudagrass features the most sought-after characteristics of high performance putting green turfgrasses. Developed by a turf grower and golf course owner, Sunday is uniquely bred to produce the ultimate golf greens while also meeting the specific needs of tennis courts and bowling greens. With genetic stability being a key concern for putting green grasses, Sunday has proven to be stable for over 25 years.

Sunday putts like an ultra-dwarf bermudagrass, manages like a dwarf bermudagrass, and feels like a bentgrass. With a massive root system, Sunday offers excellent durability and can be mowed as low as .100 inches. This ultra-dwarf has an exceptionally fine texture, uniform grain, and consistent surface for smooth ball roll. The color of Sunday is monolithic, providing a highly aesthetic green.

PRODUCT FEATURES:

- Manages like a dwarf
- Feels like bentgrass
- Can be maintained as low as .100 inches
- Genetically stable
- Massive root system
- Rapid establishment
- Excellent recovery
- Consistent color
- Uniform grain
- Stimpmeter of 11+

PRELIMINARY RESEARCH:

Sunday is included in the current National Warm Season Putting Green Test conducted by the National Turfgrass Evaluation Program (NTEP). In each progress report, Sunday is consistently a top performer in establishment, ball roll, and injury recovery.

Sunday™ Ultra-Dwarf Bermudagrass is the putting green grass of choice at facilities such as:

Hilltop Valley Golf Club – Hanoi, Vietnam
Mount Malarayat Golf & Country Club – Batangas, Philippines
Sand River Golf Club – Shenzhen, China
Cypress Creek Country Club – Boynton Beach, Florida, USA
Broken Sound Club – Boca Raton, Florida, USA
