LATITUDE 36™ bermudagrass

Latitude 36™, developed by Oklahoma State University, is the bermudagrass solution for the transition zone and beyond with winter hardiness and early spring green-up. This extremely cold tolerant turfgrass consistently rates among the top-performing bermudagrasses in the National Turfgrass Evaluation Program (NTEP).

Applications

- Golf Course Roughs
- Golf Course Fairways
- Golf Course Tees
- Sports Fields
- Landscaping

Product Features

- Dark green color
- Outstanding cold tolerance
- Top-rated wear tolerance and injury recovery
- Resistant to spring dead spot
- Excellent heat tolerance
- Soft texture, finer than NorthBridge

Characteristics	
Color	Dark Green
Fall Color Retention	Very Good
Spring Green-Up	Very Good
Establishment	Moderate
Wear Tolerance	Excellent
Injury Recovery	Very Good
Heat Tolerance	Excellent
Cold Tolerance	Excellent
Shade Tolerance	Good
Drought Tolerance	Very Good
Salt Tolerance	Good
Mowing Heights	0.5" – 3" (12.7 mm – 76.2 mm)
