

North Shore SLT™ Seeded Bermudagrass

North Shore SLT™ Seeded Bermudagrass is a recent release from Pure-Seed Testing, specifically selected for salt tolerance. With the added benefits of improved heat and drought tolerance, North Shore SLT is an excellent turf choice for projects using effluent water or in areas under water restrictions. North Shore SLT thrives in the transition zone as well as in subtropical and tropical climates.

North Shore SLT is an elite bermudagrass with excellent turf quality and density, dark green color, and a medium-fine leaf texture. Exceptional wear tolerance makes North Shore SLT a great selection for golf course tees, roughs, and fairways, sports fields, parks, lawns, and soil stabilization projects.

North Shore SLT features PURECOAT+™ water absorbent coating by Pure Seed. This patented seed coating technology enhances establishment and survivability by providing the seedling with special nutrients and water absorption capabilities, while also helping to guard against environmental pressures.

PRODUCT FEATURES:

- Dark green color
- Medium-fine leaf texture
- Excellent salt tolerance
- Improved drought and heat tolerance
- Excellent spring green-up
- Exceptional wear tolerance
- Quick establishment
- Excellent fall color retention

North Shore SLT™ is featured at such facilities as:
Carenage Bay Resort - Saint Vincent and the Grenadines
